Summary

Data Analyst with hands-on experience in ETL pipeline, EDA, SQL, Power BI, and Domo BI dashboard automation. Delivered 20% reduction in Q1 sales decline root-cause analysis and improved reporting efficiency by 50% through data integration and KPI automation. Skilled in data cleaning, EDA, DAX, and Star Schema data modeling with proven ability to translate raw data into actionable business insights.

Skills

Programming & Querying: SQL, Python, Pandas, NumPy

Data Visualization Tools: Advanced MS Excel, Google Sheet, Power BI, DOMO BI, Matplotlib, Seaborn

Analytical Abilities: Data Cleaning, Exploratory Data Analysis (EDA), Extract Transform Load (ETL), Insight Generation, Descriptive Statistics, Data Modeling, Dashboards, Reports, KPI tracking, Business Metrics, Metric Standardization

Soft Skills: Analytical Mindset, Communication, Stakeholder Requirement Gathering, Problem Solving

Experience

Data Analysis Intern

January 2026 –April 2026

TechnoData Analytics Service

Tools Used: Power BI, Excel, SQL Server, Domo BI

- Executed end-to-end **marketing campaign performance analysis** using **Google Analytics**, tracking user acquisition, session duration, landing page behavior, and geographic segmentation to evaluate campaign ROI for management reporting.
- Built automated **ETL pipeline and interactive dashboard in Domo BI**, consolidating multi-dimensional website analytics (traffic, engagement, page-level, and audience segmentation data) into a single reporting view, eliminating manual data compilation.
- Performed large-scale Shopify sales data analysis on 1M+ transaction records, designing a Power BI dashboard with scheduled data refresh/automation, enabling the client to monitor real-time sales metrics without manual intervention.
- Executed SQL and Power Query-based data transformation pipeline for the Shopify project, performing data cleaning, modeling, and structuring to support scalable and accurate real-time reporting.**
- Delivered actionable insights to stakeholders by translating raw analytics and sales data into business-ready KPIs, supporting data-driven marketing and sales decisions.

Projects

1. Amazon Sales Decline Analysis: Impact of Product Returns on Revenue | *Python, Pandas, NumPy, Seaborn, Matplotlib* | [LINK](#)

- Analyzed 110K+ Amazon sales records** by performing EDA and data visualization with Matplotlib and Seaborn to identify key sales trends.
- Examined order status distribution (delivered, canceled, and returned) to identify potential logistics issues.
- Created 11 visualizations (bar plots, pie charts, line charts, box plots) to highlight top-selling, delivered, canceled, and returned segments, reducing reporting time by 30%.
- Generated business insights and **Recommended improvements: logistics and packaging**, while developing visual dashboards to support better decision-making.

2. Customer Churn Analysis | *SQL Server · Power BI · DAX* | [LINK](#)

- Performed end-to-end data cleaning and validation on a customer churn dataset of 10,000+ records using SQL Server, handling null values, duplicate entries, and inconsistent formats to achieve 95%+ data accuracy before reporting.**
- Executed **ETL (Extract, Transform, Load) pipeline in Power Query Editor with 10+ transformation steps**, and designed a **Star Schema data model** (1 fact table, 4+ dimension tables) to enable efficient cross-table reporting and reduce dashboard load time by ~40%.
- Developed **10+ DAX measures and calculated columns** — including **Churn Rate, Retention Rate, and Month-over-Month trends** — to deliver actionable KPIs and support data-driven business decisions

Awards & Certifications

- Google Coursera SQL Certification:** Focused on SQL concepts and analytical thinking.
- Anudip Foundation Data Analysis by Python Certificate:** Completed practical case studies involving data cleaning, visualization, and presentations.
- YBI Foundation Data Analytics Certificate:** Training in data cleaning, Power BI, SQL, and Advanced Excel.Education

Bachelor of Technology (B.Tech.) in Computer Science and Engineering

IEC College of Engineering and Technology, Greater Noida, UP

Graduated: 2025

SGPA: 7.33 / 10
